ATTIRE:

FFMIA typically receives several requests for information regarding what is considered the appropriate attire during this event. Here is a quick guide:

- Recommended attire for the training sessions and membership meetings is business casual.
- Recommended attire for the Opening Ceremonies, is a Uniform, Business or Formal.
- The nightly event attire is casual.
- **Reminder that conference rooms may be cold, so a light jacket or sweater is recommended.**

FMIA Would like to take this opportunity to thank our premier members, conference sponsors and exhibitors.

2023 Child Passenger Safety Updates: More Than Just A Click: Which child passenger safety seat should caregivers use? The one that fits their child, fits their car, and that they can correctly use every time. How do you as an educator stay up to date on helping children travel more safely in your communities? You know that it takes more than just a click! This meeting will provide an opportunity for certified Car Seat Technicians to network, discuss challenges they are experiencing in the field and ideas for new outreach programs. Technicians will also review the digital checkpoint form and changes coming to the Florida Occupant Resource Center. There will also be a CPST Instructors Meeting. This meeting will provide an opportunity for certified instructors to discuss challenges and brainstorm ideas for things such as technician retention, future regional and state meetings, instructional needs and state resources.

Building Code Fundamentals of ICF Construction

Insulated concrete forms (ICF) have been in use in North America since the 1960s. First known as "Foam Form," contemporary ICF combines reinforced concrete with expanded polystyrene (EPS) insulation to create walls that meet or exceed code as it relates to fire and extreme weather events. ICF wall systems have also been used for bearing wall structures ranging from single story to high-rise buildings over 40 stories tall and everything in between. In addition to ICF walls, there are also ICF floor and roof systems. This course will provide an overview of ICF construction, review the relevant code requirements, examine the performance characteristics of ICFs, as well as offer case studies that demonstrate its uses in commercial, industrial, residential, and institutional settings.
